To whom it may concern

I know Mr Deniz N. Surucu for over eight years, that was when he was leading an organization to work on a very complex project with steel-multinational.

This was an EPC project, in brown-field area, and required detailed designing, complex planning and executing mammoth installation in working steel industry.

Mr. Deniz demonstrated extra-ordinary techno-managerial skill to lead the team to develop complete design, manufacture complex structural, and execute erection of the first phase of the project.

I wish him all the best in his professional career.

Kishor Nafde.
